DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

1. Claim 9-13 and 15-19 rejected under 35 U.S.C. 102(a) as being anticipated by Ono et al. (JP 2002-162623).

As to claims 9 and 15, Ono discloses a liquid crystal display device having enhanced transmission efficiency. As shown in figure 2, the pixel area is surrounded by a plurality of gate lines GL and data lines DL, which are orthogonal to each other. The pixel electrode is supplied a video signal from the drain signal line via a thin film transistor. See abstract. As shown in figures 1 and 3, the pixel electrode comprises a transparent conductive layer PX1 and conductive members PX2 having a light reflection function and electrically connected to the transparent conductive layer.

As to claims 10 and 16, Ono discloses reflecting conductive members PX2 that are disposed directly on the transparent conductive layer PX1 in figures 1 and 3.

As to claims 12, 13, 18 and 19, figures 1-3 of Ono show a reflective area in the region where the reflective conductive layer PX2 is disposed, and a transparent area

where only transparent conductive layer PX1 is disposed. The reflective conductive layer PX2 has a plurality of concave or convex bumps having a continuously changing slope surface.

As to claims 11 and 17, the transparent conductive layer PX1 shown in figures 1 and 3 has a flat plate shape. The opposing substrate, which is not shown, inherently has a common electrode disposed on it in order to apply a voltage to the liquid crystal layer for display. Although a liquid crystal layer is also not shown, this is also an inherent feature of the display disclosed by Ono.

Response to Arguments

Applicant's arguments filed November 27, 2006 have been fully considered but they are not persuasive. Contrary to applicant's argument that the features do not appear to be disclosed by the cited prior art, Ono clearly shows in figures 1 and 2, a transflective display having a flat plate type transparent conductive layer PX1 and conductive members PX2 having a light reflection function and electrically connected to the transparent conductive layer.

Allowable Subject Matter

Claims 1-8 allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art did not teach or suggest conductive members having light reflection

Application/Control Number: 10/522,772

Art Unit: 2871

function disposed on the surface of the transparent conductive layer randomly and dispersively. The disclosure of Yamazaki (U.S. 7,053,969) is not considered prior art due to the filing date being later than the filing date of the current application's PCT application.

Claims 14 and 20 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: none of the prior art taught or suggested the convex or concave conductive members made of conductive material mainly consisting of fine particles of gold or silver having a nano order diameter.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 10/522,772 Page 5

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Chung whose telephone number is (571) 272-2288. The examiner can normally be reached Monday-Friday 9:30 am to 6:00 pm.
